-----

It covers all operating solar farm phases with capacities of 1 megawatt (MW) or more and all announced, pre-construction, construction, and shelved projects with capacities ...

The Global Solar Atlas provides a summary of solar power potential and solar resources globally.

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs ...

Power generation from solar PV increased by a record 320 TWh in 2023, up by 25% on 2022. Solar PV accounted for 5.4% of total global electricity ...

As China and the US are reducing policy support to the solar sectors, we review the drivers of the solar boom--the fastest in the history of electricity--and our outlook for slower but ...

Here, we outline an optimized, phased pathway for integrating solar and wind energy into a globally interconnected and fully coordinated power system.

The IEA expects global PV module generation to increase by 1,800 TWh per year between 2025 and 2027, causing solar to become the second-largest renewable energy ...

Power generation from solar PV increased by a record 320 TWh in 2023, up by 25% on 2022. Solar PV accounted for 5.4% of total global electricity generation, and it remains the third ...

A comparison of the solar power status among countries and territories has been provided, considering their concentrated solar power and PV installed capacities for each ...

The global power system will be dominated by two mega-trends over the rest of the decade: solar's share in the electricity mix rising rapidly as it continues its exponential growth, ...

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects rapid growth in the ...

Utility-scale PV led global installations, but distributed PV remained strong in key markets including Germany, T&#252;rkiye, and Brazil. Curtailment is ...

Utility-scale PV led global installations, but distributed PV remained strong in key markets including Germany, T&#252;rkiye, and Brazil. Curtailment is increasingly prevalent in high ...
