A new US\$110.6 million solar project is planned for Mozambique, bringing the country one step closer to its goal of universal electrification by 2030.

The Central Solar de Mocuba (CESOM) is Mozambique's first large-scale solar power plant, addressing the country's electricity reliability issues.

This info session aims to brief developers, independent power producers, financiers, and other stakeholders about upcoming solar and energy storage tenders in Mozambique under the ...

Mozambique is advancing its renewable energy initiatives with the launch of a significant new solar project. Developed by EleQtra, the project will install a total of 14 MW of ...

Mozambique has completed feasibility and environmental impact studies for a 400-megawatt solar power plant in Tete province, ...

Mozambique has an abundant and unexploited solar resource which could be harnessed for utility scale as well as residential PV for both on/off grid electrification. The following map shows the ...

Mozambique has completed feasibility and environmental impact studies for a 400-megawatt solar power plant in Tete province, paving the way for the launch of a major ...

This info session aims to brief developers, independent power producers, financiers, and other stakeholders about upcoming solar and energy ...

3 solar power projects totalling 260MW in generation capacity with state-of-the-art Battery Energy Storage Systems (BESS), including the first 100MW floating solar PV project to be developed ...

Mozambique plans to advance with solar power stations in at least five parts of the country by 2030, with an estimated capacity of 1,000 MW of electricity production, promising a ...

Despite significant sociotechnical challenges in achieving universal low carbon, low-cost electricity access in Mozambique, one encouraging factor is the richness of potential ...

The Cuamba Solar plant supplies enough power for 21,800 consumers over the project's life and is expected to avoid the equivalent of more than 172,000 tonnes of CO2 emissions.
